

BSIA POLICIES

Policy # 2004-0001: Roofing Material

Only tile roofs are defined as acceptable per the Deed Restrictions applicable to properties within Burnt Store Isles. To accommodate members of the community and to retain the architectural integrity of the area, the definition of tile has been expanded to include metal, as well as clay and cement. No shingled roofs or flat metal roofs are considered acceptable. Those desiring to use metal roofing material are requested to complete the attached application and forward same to the Architectural Review Committee.
